EXHIBIT F4

SUPPLEMENT TO VALLEY FORGE SEWAGE TREATMENT  
PLANT AGREEMENT FOR THE PURPOSE OF COMPLYING  
WITH UNITED STATES ENVIRONMENTAL PROTECTION  
AGENCY REGULATIONS, DATED DECEMBER 2, 1985, BY AND  
BETWEEN VALLEY FORGE SEWER AUTHORITY; THE  
TOWNSHIPS OF SCHUYLKILL, EAST PIKELAND,  
CHARLESTOWN, EAST WHITELAND, TREDYFFRIN,  
WILLISTOWN, AND EASTTOWN; THE BOROUGH OF MALVERN;  
MALVERN MUNICIPAL AUTHORITY; EAST WHITELAND  
MUNICIPAL AUTHORITY; TREDYFFRIN TOWNSHIP  
MUNICIPAL AUTHORITY; EASTTOWN TOWNSHIP MUNICIPAL  
AUTHORITY, AND WILLISTOWN TOWNSHIP MUNICIPAL  
AUTHORITY

---

RECEIVED  
VALLEY FORGE SEWER AUTHORITY

SUPPLEMENT TO VALLEY FORGE SEWAGE TREATMENT PLANT  
AGREEMENT FOR THE PURPOSE OF COMPLYING WITH UNITED STATES  
ENVIRONMENTAL PROTECTION AGENCY REGULATIONS

THIS SUPPLEMENT dated as of December 2, 1985 to the Valley Forge Sewage Treatment Plant Agreement dated as of November 1, 1970, as previously amended, (hereinafter called Agreement) is entered into between the parties to said Agreement, namely, Valley Forge Sewer Authority (hereinafter called Authority), the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown and Easttown, the Borough of Malvern, Malvern Municipal Authority, East Whiteland Municipal Authority, Easttown Municipal Authority, Tredyffrin Township Municipal Authority and Willistown Township Municipal Authority.

WHEREAS, compliance with regulations promulgated by the United States Environmental Protection Agency in 40 CFR 403 is mandatory; and

WHEREAS, reference is made to Articles 5.01, 5.02, 5.03 and 10.02 of said Agreement; and

WHEREAS, capital letters and initial capital letters indicate reference to the "Definitions" provision in 40 CFR 403.3, and such definitions are incorporated herein by reference; and

WHEREAS, all references to any municipality or municipalities shall be deemed to include references to the municipal authority of each municipality where appropriate.

NOW THEREFORE, in consideration of the mutual promises herein contained the parties hereto intending to be legally bound hereby, agree as follows:

1. Legal Authority. As required by EPA each municipality agrees to adopt and diligently enforce an ordinance conforming to the minimum legal requirements contained in the General Pretreatment Regulations at 40 CFR 403.8(f)(1). Therefore, each municipality agrees to administer pretreatment programs pursuant to legal authority enforceable in federal, state or local courts which shall enable the municipality to do the following, and each municipality agrees to do the following:

(i) Deny or condition new or increased contributions of pollutants, or changes in the nature of pollutants, to the Authority's Publicly Owned Treatment Works (hereinafter called POTW) by Industrial Users where such contributions do not meet applicable Pretreatment Standards and Requirements or where such contributions would cause the POTW to violate its NPDES permit;

(ii) Require compliance with applicable Pretreatment Standards and Requirements by Industrial Users;

(iii) Control, through permit, contract, order, or similar means, the contribution to the POTW by each Industrial User to ensure compliance with applicable Pretreatment Standards and Requirements;

(iv) Require (a) the development of a compliance schedule by each Industrial User for the installation of technology

required to meet applicable Pretreatment Standards and Requirements and (b) the submission of all notices and self-monitoring reports from Industrial Users as are necessary to assess and assure compliance by Industrial Users with Pretreatment Standards and Requirements, including but not limited to the reports required in 40 CFR 403.12;

(v) Carry out all inspection, surveillance and monitoring procedures necessary to determine, independent of information supplied by Industrial Users, compliance or noncompliance with applicable Pretreatment Standards and Requirements by Industrial Users. Representatives of each municipality and representatives of Authority shall be authorized to enter any premises of any Industrial User in which a Discharge source or treatment system is located or in which records are required to be kept under 40 CFR 403.12(m) to assure compliance with Pretreatment Standards. Such authority shall be at least as extensive as the authority provided under section 308 of the Act;

(vi) (a) Obtain remedies for noncompliance by any Industrial User with any Pretreatment Standard and Requirement. Each municipality certifies that it is able to, and agrees to, seek injunctive relief for noncompliance by Industrial Users with Pretreatment Standards and Requirements. Each municipality agrees to pass legislation to, and agrees to, seek and assess civil or criminal penalties for noncompliance by Industrial Users with Pretreatment Standards and Requirements. Each municipality agrees to require

Industrial Users to submit to the remedy of specific performance for breach of contract.

(b) Each municipality agrees to enact and enforce Pretreatment Requirements through the remedies set forth in paragraph (f)(1)(vi)(A) of 40 CFR 403.8, [the immediately preceding (vi)(a) herein] which will include, but not be limited to, the duty to carry out inspections, entry, or monitoring activities; any rules, regulations, or orders issued by the municipality or Authority; and any reporting requirements imposed by the municipality, Authority or said EPA regulations. Each municipality shall have authority and procedures (after informal notice to the discharger) immediately and effectively to halt or prevent any discharge of pollutants to the POTW which reasonably appears to present an imminent danger to the health or welfare of persons. Each municipality shall also have authority and procedures (which shall include notice to the affected Industrial Users and an opportunity to respond) to halt or prevent any discharge to the POTW which presents or may present an endangerment to the environment or which threatens to interfere with the operation of the POTW.

2. Prohibited Discharges. Each municipality agrees to develop and enforce specific limits to implement the prohibitions listed in 40 CFR 403.5(b), to prohibit introduction into the POTW of any pollutant which might pass through the POTW or interfere with the operation or performance of the works as mentioned in 40 CFR 403.5(a), and to require compliance with national standards. In addition to the

foregoing, each municipality agrees to adopt as part of its ordinance and enforce specific discharge limits at least as stringent as the specific discharge limits established in Rules and Regulations Governing the Acceptance of Industrial Wastes adopted by Authority, as the same may be amended from time to time.

3. Procedures. A. Each municipality shall develop and implement procedures to ensure compliance with the requirements of a Pretreatment Program. At a minimum these procedures shall enable each municipality to, and each municipality agrees to:

(i) Identify and locate all possible industrial users which might be subject to the Pretreatment Program as often as may be required by an appropriate entity. Any compilation, index or inventory of industrial users made under this paragraph shall be made available to the Regional Administrator or Director upon request, and shall be delivered to Authority;

(ii) Identify the character and volume of pollutants contributed to the POTW by the industrial users identified under 40 CFR 403.8(f)(2)(i). This information shall be made available to the Regional Administrator or Director upon request, and shall be delivered to Authority;

(iii) Notify industrial users identified under 40 CFR 403.8(f)(2)(i) of applicable Pretreatment Standards and any applicable requirements under section 294(b) and 405 of the Act and Subtitles C and D of the Resource Conservation and Recovery Act;

(iv) Receive and analyze self-monitoring reports and other notices submitted by industrial users in accordance with the self-monitoring requirements in 40 CFR 403.12, and deliver copies to Authority;

(v) Randomly sample and analyze the effluent from Industrial Users and conduct surveillance and inspection activities in order to identify, independent of information supplied by Industrial Users, occasional and continuing noncompliance with Pretreatment Standards. The results of these activities shall be made available to the Regional Administrator or Director upon request, and shall be delivered to Authority;

(vi) Comply with the public participation requirements of 40 CFR Part 25 in the enforcement of National Pretreatment Standards. These procedures shall include provision for at least annually providing public notification, in the largest daily newspaper published in the municipality in which the municipality is located, of Industrial Users which, during the previous 12 months, were significantly violating applicable Pretreatment Standards or other Pretreatment Requirements. For the purposes of this provision, a significant violation is a violation which remains uncorrected 45 days after notification of noncompliance; which is part of a pattern of noncompliance over a twelve-month period; which involves a failure to accurately report noncompliance; or which resulted in the POTW and the municipality exercising its emergency authority under 40 CFR 403.8(f)(1)(iv)(B).

B. Each municipality has the duties and responsibilities set forth in the Agreement and this Supplement. Nevertheless, at the insistence of EPA, the parties agree that Authority shall have, and is hereby given, the authority to do any act, and/or require any act, which any municipality has the authority to do or require pursuant to Sections 1 through 3A of this Supplement; provided, however, that Authority shall not acquire any duty, responsibility or liability by virtue of this paragraph. No action by Authority pursuant to this paragraph shall be deemed to be a pre-emption of, or an assumption of, any duty or responsibility of any municipality. In addition, or in the alternative, Authority may seek a decree requiring specific performance of any provision of this Supplement.

4. A. Ordinances. Each municipality agrees to adopt and diligently enforce an ordinance exercising all legal authority mandated by this Supplement or otherwise necessary to implement provisions of said Agreement, this Supplement and federal, state and local regulations. Each municipality shall adopt and diligently enforce an ordinance containing provisions necessary or appropriate to require compliance within such municipality with Authority's Rules and Regulations Governing the Acceptance of Industrial Wastes, as they may be amended from time to time.

B. Any authorized officer or employee of Authority may enter and inspect any part of any municipality's sewer system at any time, and may take samples. Any authorized officer or employee of

Authority may enter and inspect industrial premises that discharge to any municipality's sewer system and may take samples. Each municipality shall make all necessary arrangements for such inspections. The right of inspection shall include, without being limited to, on-site inspection of anything on or under industrial premises, observation, measurement, sampling, testing and access to (with the right to copy) all pertinent compliance records located on industrial premises. Each municipality shall enforce the reporting and sampling provisions of Authority's Rules and Regulations Governing the Acceptance of Industrial Wastes as they may be amended from time to time.

C. Each municipality's ordinance shall contain suitable provisions so that Authority shall have the authority (but not the duty) to do such monitoring, sampling, inspecting, information gathering, report-requiring and enforcement as Authority deems appropriate in furtherance of the provisions of this Supplement. Each such ordinance shall require submission to such monitoring, sampling, inspecting, information gathering and report-requiring as Authority may deem appropriate in furtherance of the objectives set forth in 40 CFR 403. Each such ordinance shall require industrial users to pay to Authority service charges to cover the cost of sampling and analysis deemed necessary by Authority. Each such ordinance shall require the installation and operation of monitoring facilities and pretreatment facilities pursuant to Authority's Rules and Regulations Governing the Acceptance of Industrial Wastes, as they may be amended from time to time.

D. Each municipality's ordinance shall contain suitable provisions so that Authority shall have authority to impose upon industrial users a surcharge (hereinafter called Surcharge) to cover such additional costs for treatment as may be incurred by Authority. Such Surcharge shall be in addition to regular sewer service charges and shall be payable to Authority as herein provided:

(i) Determination of Surcharge: The strength of any industrial waste discharge which is to be subject to Surcharge shall be determined as provided in Authority Rules and Regulations covering the acceptance of industrial waste as they may be amended from time to time.

(ii) Calculation of Surcharge: The charges determined as provided in Authority Rules and Regulations shall be a quarterly Surcharge applied in addition to the basic user charge collected through provisions of each municipality's ordinance. Such Surcharge amounts shall be due and collectible by Authority directly from industrial users on a quarterly basis. Each municipality agrees to provide Authority with quarterly industrial waste flow data expressed in million gallons for industrial users identified by Authority as subject to Surcharge provisions herein contained. Each municipality agrees to enforce such available remedies as may be necessary to collect such Surcharge amounts imposed by Authority.

(iii) The dollar amount of any Surcharge collected by Authority from an industrial user shall be deducted from the dollar amount of any penalty charge owed pursuant to Section 5.06 of the

Agreement by the municipality within which such industrial user is located. Surcharges and penalty charges shall not excuse any municipality from complying with the provisions of the Agreement and in particular the provision of Section 5.05 of the Agreement, i.e., Surcharges and penalty charges are not intended to waive the requirement that each municipality keep the characteristics of its discharge within all required limits.

(iv) Collection of Surcharges: Each municipality agrees to make good faith efforts to help Authority collect, or to collect for Authority Surcharges which are not paid to Authority when due. Because of the provisions of the first sentence of the immediately preceding iii hereof, municipalities may want to include in their ordinances such provisions as they deem appropriate to aid their collection efforts, such as requiring that delinquent Surcharges be paid to the municipalities for delivery to the Authority.

E. Each municipality's ordinance shall require that categorical pretreatment standards promulgated by the U. S. Environmental Protection Agency (EPA) [promulgated by authority of the Clean Water Act, Sections 307(b) and (c)] from time to time be automatically incorporated by reference into such municipality's ordinance. Such standards shall supersede any specific discharge limits in such ordinance which are less stringent than the categorical standards as they apply to the particular industrial subcategory. Each municipality shall notify all affected industrial users of pertinent

categorical standards and monitoring and reporting requirements contained in 40 CFR 403.12 or included as part of the categorical standard.

F. Each municipality shall incorporate into its ordinance, inter alia:

(i) A provision requiring any industrial user responsible for a significant accidental discharge to notify immediately both the Authority and such municipality (with such provision being essentially similar to a provision to be set forth in Authority's Rules and Regulations after consulting each municipality);

(ii) A prohibition on the use of dilution as a control technique for compliance with discharge limits except as allowed by Federal Pretreatment Standards (with such provision being essentially similar to a provision to be set forth in Authority's Rules and Regulations after consulting each municipality);

(iii) A grant of authority for Authority to impose mass discharge limits upon industrial users in lieu of, or in conjunction with, concentration discharge limits (with such provision being essentially similar to a provision to be set forth in Authority's Rules and Regulations after consulting each municipality);

(iv) A prohibition against and penalty for the knowing transmittal of false information by an industrial user to either the Authority or such municipality; and

(v) A provision requiring each industrial user prior to

discharging any waste to any sanitary sewer, or prior to continuing discharging any waste to any sanitary sewer ninety (90) days after the actual execution of this Supplement by all parties (unless such time is extended by Authority), to obtain from Authority an industrial discharge permit and enter into an agreement with Authority containing such provisions as Authority may require.

G. Each municipality shall adopt in its ordinance definitions for significant industrial user and industrial user which are identical to the definition of significant industrial user and industrial user adopted by the Authority. The Authority may make the final determination as to whether a particular industrial user is a significant industrial user or industrial user based on information the Authority may request from such municipality and such industrial user. The Authority may control, through industrial discharge permits, industrial waste discharges from each significant industrial user or industrial user discharging into any sewer ultimately discharging into Authority's plant. As a condition precedent to the issuance of an industrial discharge permit, the Authority may require industrial users to enter into agreements with the Authority containing such provisions as the Authority deems appropriate in furtherance of its effort to comply with regulations promulgated by the United States Environmental Protection Agency in 40 CFR 403. Each municipality's ordinance shall require each industrial user to reimburse Authority for Authority's costs (as determined by Authority) in connection with the issuance of an

industrial discharge permit (and any accompanying agreement) for such industrial user. The appropriate municipality shall be given an opportunity to join in each such agreement and add whatever additional provisions it deems necessary for its protection, provided that such additional provisions shall not be less stringent than those included by the Authority. Without the Authority's written consent no municipality shall issue an industrial discharge permit to any significant industrial user or industrial user discharging into any sewer ultimately discharging into Authority's plant. The appropriate municipality shall be given an opportunity to join in each industrial discharge permit issued by Authority and shall be given an opportunity to add whatever additional provisions it deems necessary for its protection, provided that such additional provisions shall not be less stringent than those included by the Authority. Authority agrees not to issue a permit without the consent of the appropriate municipality, but the Authority shall have the right to include any provisions it deems appropriate.

In addition to the foregoing, no municipality shall permit any significant industrial user or industrial user to discharge into any sewer directly or indirectly discharging into any portion of the Valley Creek Trunk Sewer without first obtaining written consent from Tredyffrin Township or Tredyffrin Township Municipal Authority. No municipality shall permit any significant industrial user or industrial user to discharge into any sewer directly or indirectly discharging into any portion of the East Whiteland Trunk Line without first obtaining

written consent from East Whiteland Township or East Whiteland Municipal Authority and from Tredyffrin Township or Tredyffrin Township Municipal Authority.

H. Each municipality shall promptly provide Authority with a certified copy of its ordinance and any amendments thereto, other interjurisdictional agreements, if permitted (unless they pertain to wastewater that cannot reach Authority's sewage treatment plant), and any contract entered into for the purposes of industrial waste control. Each municipality shall provide the Authority access to and copies of all industrial monitoring reports including 40 CFR 403.12 compliance reports, self-monitoring reports, baseline reports, records of violations and actions taken, any other monitoring or reporting imposed by federal, state or local regulations, and any other relevant information. Such records and other relevant information shall be maintained for at least three years.

5. Miscellaneous. A. The provisions of this Supplement are in addition to, and not in derogation of, provisions for the benefit of Authority in said Agreement.

B. Each municipality shall indemnify Authority for all damages, fines and costs incurred as a result of any one or more discharges originating in such municipality. Without limiting the generality of the foregoing, each municipality shall indemnify Authority and shall reimburse Authority for fines and costs directly or indirectly arising from, or related to injury to Authority personnel, damages to

Authority facilities, degradation of sludge quality, NPDES permit violation, and all other air, water and sludge quality violations resulting from such discharges. In addition, each municipality agrees to pay to Authority for application toward actual annual operating expenses of the Treatment Plant a sum calculated by a consulting engineer selected by Authority to be the total of (a) increased treatment costs, (b) increased costs for proper sludge use or disposal, (c) increased engineering and legal fees, and (d) sampling, testing and investigative expenses incurred as a result of any one or more industrial waste discharges originating in such municipality. The final determination as to how payments stipulated in the preceding two sentences shall be allocated shall be made by the certified public accountant who prepares the annual statement mentioned in Section 4.05 of said Agreement. Each municipality agrees to totally and absolutely protect, exonerate, defend, indemnify and save Authority harmless from and against any and all liabilities and costs which may arise out of any one or more industrial waste discharges originating in such municipality and from any and all claims by or on behalf of any person or persons, firm or firms, corporation or corporations arising directly or indirectly from such municipality's violation of any provision of said Agreement or this Supplement and from and against all costs, counsel fees, expenses and liabilities incurred in or about the defense of any claim or action resulting directly or indirectly therefrom. Each municipality agrees that it will not resist a claim by Authority for

indemnification on the grounds that the right to indemnification is not set forth herein with sufficient clarity or particularity. The provisions of this paragraph apply not only to Authority directly, but also to all members, officers, agents and employees, past, present and future of Authority. The parties recognize that whatever is not collected from a municipality pursuant to this paragraph (or from an industry), shall be an operating expense of the Treatment Plant pursuant to Section 4.06 of the Agreement.

The parties agree that the following provision in the Valley Creek Trunk Sewer Agreement: "In order to control the sewage entering Valley Creek Trunk Sewer, Valley Forge Sewer Authority will sample the discharge from each municipality or municipality authority periodically to insure that no characteristic is evident which would be deleterious to the Valley Creek Trunk Sewer or the Valley Forge Treatment Plant or the treatment process" and a similar provision in Section 5.05 of the East Whiteland Trunk Line Agreement merely mean that Authority will do sampling infrequently and does not mean that Authority has undertaken to do sampling as often as might be necessary to insure that no characteristic is evident which would be deleterious to the East Whiteland Trunk Line, or the Valley Creek Trunk Sewer or the Valley Forge Treatment Plant or the treatment process. The parties understand and agree that the Authority has not undertaken to control the sewage entering either the Valley Creek Trunk Sewer, the East Whiteland Trunk Line or the Valley Forge Treatment Plant. The parties agree not to

attempt to use the above-mentioned sentences against the Authority in any way whatsoever, including without being limited to litigation involving the Authority and/or any request by the Authority for indemnification.

The phrase "each municipality" as used in this subsection B of Section 5 shall mean each of the parties to this Supplement except Valley Forge Sewer Authority (which need not agree to indemnify itself) and the townships that have Valley Forge Sewer Authority as their operating authority, namely Charlestown, East Pikeland and Schuylkill Townships; the obligations of each of said three townships with respect to indemnification shall not be increased by this subsection B of Section 5, but shall be whatever they may be pursuant to the Valley Forge Sewer Treatment Plant Agreement dated November 1, 1970, the Valley Creek Trunk Sewer Agreement, as amended, the East Whiteland Trunk Line Agreement, as amended, and the law of Pennsylvania. With respect to discharges originating within any one of said three townships, if no industry nor township is liable, Authority, as an operator of a sewage collection system, agrees to pay to the treatment plant operating fund the amount the township in which such discharge originates would be obligated to pay pursuant to this subsection B of Section 5 if such township were included in the phrase "each municipality."

C. Authority may seek injunctive relief against any industrial user of any municipality's sewer system if such user's discharge reasonably appears to present an imminent danger to the health

or welfare of persons, or the environment, or if a discharge threatens to interfere with the operation of the waste water treatment system; provided, however, that Authority shall not be required to seek injunctive relief, because in any of such events, each municipality, upon request of Authority, agrees promptly to seek injunctive relief against any such industrial user of such municipality's sewer system. In any of such events Authority may immediately take steps to identify the source of the discharge and to halt or prevent such discharge, including, but without being limited to the right to pursue self-help remedies.

D. If there presently exists any industrial user discharging to any municipality's sewer system but located outside the jurisdictional limits of such municipality, then each such municipality shall negotiate and enter into an agreement with such outside jurisdiction. Such agreement shall be substantially equivalent to this Supplement as amended, and shall be jointly executed by such municipality, the Authority, and the outside jurisdiction. If the outside jurisdiction refuses to negotiate and execute an agreement, then such municipality shall enter into a contract with the industrial user which contains terms and conditions substantially equivalent to the Authority's industrial waste discharge agreements.

E. The Authority may review each municipality's ordinance and amendments thereto, and any interjurisdictional agreements if permitted, for conformance with 40 CFR 403 and this Supplement. The

Authority may periodically review the enforcement efforts of each municipality to ascertain whether pretreatment requirements are being diligently enforced. To the extent any municipality administers its own pretreatment program, the Authority may periodically review the pretreatment program activities and funding to ensure that such municipality is adequately administering its pretreatment program in conformance with the Federal Pretreatment Regulations (40 CFR 403) and all Authority requirements.

F. If the Authority determines that any municipality has failed or has refused to fulfill any pretreatment obligations, the Authority may develop and issue a remedial plan containing a description of the nature of the pretreatment deficiencies, an enumeration of steps to be taken by each municipality, and a time schedule for attaining compliance with all pretreatment requirements. Such plans shall be specifically enforceable in a court of competent jurisdiction. Where such municipality fails to satisfy the terms of the remedial plan, the Authority may, upon thirty days written notice, refuse to accept any industrial waste discharges from such municipality.

G. The final paragraph of subsection B of Section 5 of this Supplement shall have priority over this subsection G of Section 5. The townships that have Valley Forge Sewer Authority as their operating authority, namely, Charlestown, East Pikeland and Schuylkill Townships, desire that their obligations not be increased by this Supplement, but that their obligations shall be as they would be if said

townships had not executed this Supplement; provided, however, that with respect to each provision of this Supplement, each of said three townships agrees to do everything required by such provision whenever no Pennsylvania statute gives Valley Forge Sewer Authority the necessary legal authority to adopt, enforce (i.e., be entitled to an order of Court requiring compliance) and fine for violation of a regulation which would ensure compliance with such provision. To the extent that it is possible to segregate the issue of spending money from the issue of indemnification, which is addressed in subsection B of Section 5, said three townships and Valley Forge Sewer Authority have agreed in principle that the Authority will spend Authority funds to administer an industrial pretreatment program.

This Supplement may be executed in any number of counterparts, each of which may be deemed an original.

IN WITNESS WHEREOF, each of the parties hereto has caused this Supplement to be executed and attested by its proper officers,\* pursuant to the proper action of its governing body as of the day and year first above written.
